RE: Levy Freeze Options for 2014

DATE: October 3, 2013

On August 30, 2013 the Department of Local Government Finance ("Department") certified the "levy freeze" income tax rates pursuant to I.C. 6-3.5-1.5. These are the rates that would need to be imposed to fully fund operating levy growth with income tax instead of property tax.

The law requires that the council adopt the Department-certified rate for years 1 and 2 only. This year, councils now have the option of adopting the higher rate or leaving the rate the same. (Note that the rate may not be reduced or rescinded.) This leaves councils with three options, outlined on Page 2 of this memorandum.

The Department needs to know which of the three options the council selects before we can begin processing the 2014 budget order. Specifically, the Department needs to know which growth factor to apply to the levies and how to allocate the levy freeze revenues. **The Department requests that all councils indicate in writing which of the three options the council selects and submit that to Courtney Schaafsma, Budget Division Director by November 1.** This will allow the Department to correctly administer the will of the council. Work on the county's budget order will be on hold until the information is submitted. **Submission of this information in advance of the November 1 deadline will put the county in a better position to ensure on-time billing.**

Please note that Department field staff conducted budget workshops with the assumption that the levy would remain frozen (option 1 or option 2). Units in counties where option 3 is under consideration should independently review their advertising to ensure that the advertised levy can accommodate levy growth. The Department will not certify a levy that is greater than what was advertised by the unit.

If you have any questions, please contact Courtney Schaafsma, Budget Director, at cschaafsma@dlgf.in.gov or 317.234.3937.

Options for 2014 Funding for Counties adopting LOIT Levy Freeze

OPTION 1:

Adopt the Department-certified income tax rate and keep the levy frozen. If this option is selected, the levy growth factor on operating funds would be 0% and the growth would be fully funded from income tax.

OPTION 2:

Keep the income tax rate the same and keep the levy frozen. If this option is selected, the levy growth factor on operating funds would be 0% and the revenue raised from the income tax rate would be distributed in proportion to the levy freeze amount calculated under I.C. 6-3.5-1.5. For example, if the total levy freeze amount in the county were \$1,000,000 and the income tax revenue were \$750,000, each unit within the county would have only 75% of its growth funded with income tax revenues. The remaining growth would not be funded from current-year revenues. Pursuant to I.C. 6-3.5-1.1-24(o) and I.C. 6-3.5-6-30(o), money may be distributed from the county stabilization fund if the certified distribution for levy freeze is less than the levy freeze amount for that year.

OPTION 3:

Keep the income tax rate the same and allow the levy growth to come from property taxes. If this option is selected, then the levy growth factor on operating funds is 2.6%, and the revenue generated from the income tax funds prior year growth only. Pursuant to I.C. 6-3.5-1.1-24(o) and I.C. 6-3.5-6-30(o), money may be distributed from the county stabilization fund if the certified distribution for levy freeze is less than the levy freeze amount for that year.
